“Iteca Exhibitions”

Dear ladies and gentlemen,

On behalf of the Ministry of Agriculture of Uzbekistan and on my own behalf, I would like to greet the participants, guests and organisers of the 19th Agriculture AgroWorld Uzbekistan 2024 International Exhibition!

Uzbekistan is pursuing dynamic reforms and transformation of the economy. Large-scale reforms are also underway in the agrofood sector, opening up new and significant opportunities for further expansion and diversification of this sector.

The potential for the development of agricultural production in Uzbekistan is very high, both in terms of conventional crop production, and in relation to the application of new innovative practices and technologies. Today, the domestic agro-industrial complex has successfully addressed the issues of ensuring the national food security, import substitution, and building up its export potential.

The role of the annual industry platform, which is AgroWorld Uzbekistan in this great activity is obvious, where the latest achievements in the field of technology and breeding, cultivation and processing of agricultural products, animal husbandry and farm modernization are demonstrated.

We wish all participants and guests productive and fruitful work.

Sincerely yours,

Deputy Minister

A. Shukurov
